

Java Developer

Do you like challenges, responsibility and independence? Are you a creative, enthusiastic IT-freak, at ease with modern technologies like Java, email and web development? Does it appeal to you to work in an international environment? Do you have the ambition to develop your technical skills?

If you join us, you will be part of an enthusiastic SCRUM team of experienced software developers and you will have great freedom to turn your technical dreams and creative ideas into reality. With us you don't just implement new features, you have a say on the architecture and design of the software. In addition, we offer you a good salary, flexible hours and a great work-life balance.

If this sounds fun to you, come on! We are looking for you!

Required skills

- Bachelor or Master's degree in Software Engineering
- Proficiency in Java, CSS, JavaScript, HTML
- 5 years of experience in a similar position
- Good command of English, both spoken and written
- Proficiency in C++, knowledge of Mozilla native code, Visual Studio, REST, and page description languages are an advantage

Tasks and Responsibilities

- Analyze, design, develop, maintain, document and test software, applications and solutions (JAVA, JS, HTML, CSS)
- Review and complement specifications
- Create technical designs and research possible solutions
- Work with OSGi, Eclipse, Jenkins, JIRA and SVN

Your profile

- Analytical
- Innovative
- A good communicator
- Creative
- Customer-oriented
- Quality-focused
- Independent, yet also good at teamwork

What we offer

- A job in a pleasant, international and enthusiastic working environment
- Good salary
- Flexible working hours and the possibility to work from home
- Great freedom of choice in techniques
- The opportunity to develop yourself
- The opportunity to build up knowledge of, and experience with, graphic design, printing, apps, email and the web.
- You help to further develop modern software that is already being used by over 20 000 customers around the world!
