

To lighten the text, the masculine prevails but is used without regard to gender.

Objectif Lune is seeking for a technical software genie to work in our EMEA Professional Services Team in Ede, the Netherlands.

Would you like to work on different challenging projects for our customers? Do JavaScript, HTML or CSS hold no secrets for you? Then you might be our new recruit.

As technical consultant you will design, build and maintain custom made solutions for our customers and adopt, adjust or enhance customer solutions, made by colleagues or third parties.

After an internal training you will be responsible for the implementation of our software solutions. You will support our sales team in pre-sales activities and provide technical training and demos to our customers and partners.

Programming, testing and implementing of technical and functional specifications will be your primary responsibility. The translation from technical requirements to a project definition is an important part of the job.

Traveling within the Benelux is a standard element of this role (an occasional trip outside the Benelux might occur). Je werkt in een omgeving waarbij reizen in de Benelux een standaard onderdeel van je functie is en incidenteel in het buitenland.

As a member of the Professional Services team customer satisfaction is the keyword.

Tasks and Responsibilities

- Clarify requirements
- Customize software
- Test software
- Support our software developers
- Handle change requests and create proof of concepts
- Technical support for our sales team
- Give product training and/or workshops to re-sellers, customers and employees

What we need

- HBO level from education or experience
- You're a driven, customer-oriented team player.
- You are analytically strong, and your problem-solving skills are well developed.
- Good communication skills (fluent in both Dutch and English, French is an asset)
- Extensive knowledge of Microsoft Windows and Microsoft Office
- Knowledge of JavaScript, HTML/CSS, Json & RestAPI is a must. Knowledge van PHP, VisualBasic, VBscript, PostScript, PCL is an asset.
- Internally we use tools like Jira, SharePoint, SVN, MS Office
