

BACK-END WEB DEVELOPER

Objectif Lune, a world leader in software solutions that transform data and documents into adaptative customer communications, is currently developing a Cloud-based solution on the Azure platform. We are therefore looking for a **Back-End Web Developer** to join our international multidisciplinary team dedicated to creating this solution.

Are you up to date with the latest trends? Do you aspire to combine usability and visual design? Would you like to immerse yourself in a fully customer-centric philosophy and participate in creating an attractive digital environment for our users? This job may be for you!

YOUR TECHNICAL KNOWLEDGE

- Java, Java Spring Boot, JavaScript
- C# 4.5 / ASP.NET MVC 5+ / Entity Framework 6 / Web API
- Visual Studio and IntelliJ
- MS SQL Server and MongoDB
- Gitlab and MS Azure DevOps
- Asset: Knowledge of MS Azure

YOUR KEY RESPONSIBILITIES

- Translate business requirements into technical designs for the Cloud Portal
- Design, develop, maintain and improve the Portal
- Ensure the performance and security of the Portal
- Integrate with third party systems (e.g., Azure, Azure B2C)
- Work closely with Front-End Developers to improve usability and customer experience
- Produce a high quality, well documented and future-proof code
- Ensure quality control, troubleshooting and debugging
- Participate in the continuous improvement of methods and processes
- Stay on top of trends and best practices

YOUR PROFILE

- We work in French but most of our communications with our international colleagues are in English. It is therefore required to be fluent in both languages.
- Passion for Web technologies with a drive for excellence
- Analytical mind always looking for clever and innovative solutions
- Great rigor in coding, testing and documentation activities
- Attention to detail and high level of accuracy
- Autonomy, initiative and ability to make decisions
- Good communication skills
- Comfortable with managing priorities in a multitasking environment
- Proactive team player

YOUR EDUCATION & EXPERIENCE

- Minimum 2 years of experience as Back-End Web Developer or similar role
- Degree in Computer Science or equivalent

LOCATION & SCHEDULE

- Montréal (HoMa), QC | Telework in times of pandemic.
- Flexible schedule from Monday to Friday but influenced by projects and requests.
