

## AZURE TECHNICAL LEAD

Objectif Lune, a world leader in business composition solutions, process automation, and multi-channel output and capture, is moving to the Cloud and currently develops a Cloud-based solution using Azure. To complement our team, we are looking for an [Azure DevOps Technical Lead](#) to join a multi-disciplinary and global group dedicated to creating comprehensive Cloud solutions for the business.

Are you deeply technical, enjoying solving complex challenges? Do you want to be part of the groundwork required to launch new Cloud-based software driven services? Would you like to work in a real DevOps environment? This job may be for you!

### YOUR KEY RESPONSIBILITIES

- Collaborate with business stakeholders, technology leadership and development teams to translate features and requirements to technical designs and, if required, propose different options that meet those requirements.
- Build positive working relationships with our Azure Expert Managed Services Provider (MSP) and with any other relevant complementary third-party providers.
- Provide Azure technical architecture leadership and direction on projects resulting in scalable, reliable, and maintainable platforms.
- Help design and build CI/CD deployment pipelines and other automation solutions using a wide range of Microsoft and opensource tools.
- Develop and integrate automations for every aspect of Infrastructure as Code using Azure Resource Manager (ARM) Templates or Terraform.
- Ensure security and governance is the center of our solutions leveraging your familiarity with Azure Security components such as Azure Security Centre and Sentinel Centre.
- Maintain a point of view on new Microsoft Azure innovations and capabilities, with a view to integrating them into development of Azure-hosted solutions.

### YOUR EXPERIENCE AND TECHNICAL SKILLS

- 2 to 5 years hands-on experience design and development background in Azure across a wide range of Azure services.
- Demonstrated experience of translating business use cases or requirements to technical solutions.
- Experience working as part of a cross functional Scrum team in an Agile environment.
- Deep knowledge of Microsoft products particularly Azure, Cloud Technologies, Hybrid Architectures, and Application Architectures.
- Project experience in design, implementation, and/or support of Microsoft Azure based solutions.
- Strong familiarity with cloud security, infrastructure, scalability, and operations.
- Experience with Azure DevOps architecture & design for CI/CD pipelines and zero downtime deployments.
- Familiarity with Azure's Data management options (SQL Database, SQL Server in a VM, Blob Storage, Table Storage).
- Hands-on experience on Azure App Service, Azure Virtual Machines, Azure Network, Azure Backup, and Azure API Management.
- Comprehensive understanding of authorization, authentication such as Azure AD, Azure B2B, Azure B2C.
- Experience in working with containerization and container management with Docker and Kubernetes, and with microservice-based applications.

### YOUR PROFILE

- You are deeply technical and enjoy solving complex technical challenges.
- You have great communication skills and an ability to communicate and present information to technical and non-technical stakeholders, both verbally and in written form.
- You have hands-on experience deploying infrastructure in Azure.

- You have proven experience in a technical lead or operations position with great communication skills.
- You have a passion for technology & a thirst for knowledge with an openness to learning new and emerging DevOps and cloud technologies.
- You demonstrate process and quality orientation, and attention to detail.

### **YOUR EDUCATION**

- Degree in Computer Science or any relevant field.
- Microsoft Azure Certifications Developer or Architect.

### **LOCATION & SCHEDULE**

- Manchester, UK | Telework in times of pandemic.
- Flexible schedule from Monday to Friday.
- Possibility of short trips (1 day to 1 week) within the UK and internationally, including departures or returns on weekends.
